1. Applicant's argument states that "the combination is not motivated, the combination does not support the rejection and there is no stated correspondence between many of the limitations of these claims and the asserted combination".

The Examiner, respectfully, disagrees with Applicant's argument because it is not necessary that the references actually suggest, expressly or in so many words, the changes or improvements that applicant has made. The test for combining references is what as a whole would have suggested to one of ordinary skill in the art.
